

## Firefox for Mac OS X.4.4

In order for most Web-based processes to function as desired, the following recommendations are suggested on the end-user's desktop computer. AIS recommends and fully supports the Firefox Web Browser for the Macintosh Operating System.

AIS recommends that all users of Apple's Macintosh Operating Systems utilize the Mac OS X.4.4, which at present is the latest operating system version, with the **Firefox 1.5.0.1** web browser.

In order to verify the version of **Firefox** installed:

- Open an instance of **Firefox** and locate the toolbar on the top of the browser window with the following drop down menus:  
**Firefox | File | Edit | View | Go | Bookmarks | Tools | Window | Help**
- From the Firefox toolbar, click **Firefox**, and then click **About Mozilla Firefox...**
- The version number will be listed in a new window. Verify that the version is **Firefox 1.5.0.1**

If the version is not **Firefox 1.5.0.1**, AIS recommends downloading the latest version of the [Firefox](#) web browser.

Once verified that **Firefox 1.5.0.1** version is running on the desktop system, confirm that the following recommended settings be selected:

- Open an instance of the Firefox browser and locate the toolbar on the top of the browser window with the following drop down menus:  
**Firefox | File | Edit | View | Go | Bookmarks | Tools | Window | Help**
- From the Firefox toolbar, click **Firefox**, and then click **Preferences...**
- Click on the links below to go directly to the specific category recommendations area within the document.

The "Clear" button next to each subcategory allows you to clean all saved information at any time.

- For "History"
  - AIS has no specific recommendations
- For "Saved Form Information"

- Click on the arrow next to the title
  - Deselect the "Save information I enter in web page forms and the Search Bar" check box
  - For "Saved Passwords"
    - Click on the arrow next to the title
    - Deselect the "Remember Passwords" check box
  - For "Download Manager History"
    - AIS has no specific recommendations
  - For "Cookies"
    - Click on the arrow next to the title
    - Verify that the "Allow sites to set cookies" check box is selected
    - From "Keep Cookies:" drop down menu select "until I close Firefox"
  - For "Cache"
    - Click on the arrow next to the title
    - Verify that the "Use up to:" text box reads "50000"
- 

## Web Features

Click on the Web Features icon.

- Select the "Block Popup Windows" check box
- Click on the "Allow Sites" button
  - In the "Address of web site" text area type the site names for which you want to allow popup windows to be generated. Once the name site name is entered, click on the "Allow" button.
  - AIS recommends adding the following sites:
    - ais.usc.edu
    - ais-sap.usc.edu
    - ais-alt1.usc.edu
    - ais.alt2.usc.edu
    - ais-ss.usc.edu
    - ais-troy.usc.edu
    - ais-epi.usc.edu
    - aisweb.usc.edu
    - ppbs-dev1.usc.edu
    - fismaser2.usc.edu
    - fismaster4.usc.edu
    - fismaster5.usc.edu
    - mmoris-sun.usc.edu
    - ais-alt2x.usc.edu
    - ais-epix.usc.edu

- Click on the "OK" button to register the changes and close the window
  - Deselect the "Allow web sites to install software" check box
  - Select the "Load Images" check box
  - Select the "Enable Java" check box
  - Select the "Enable JavaScript" check box
  - Click on the "Advanced" button
    - In the "Allow scripts to:" window verify that all check boxes are selected
    - Click the "OK" button to register the changes and close the window
- 

## **Downloads**

Click on the Downloads icon. This will display the following four subcategories under the Downloads icon:

- **Download Folder**
  - **Download Manager**
  - **File Types**
  - For "Download Folder"
    - AIS has no specific recommendations
  - For "Download Manager"
    - AIS has no specific recommendations
  - For "File Types"
    - AIS has no specific recommendations
-
